PROJECT

Portfolio Website

Created with React

Live link: <https://my-portfolio-9721b.web.app/>

- Designed and developed a responsive personal portfolio website using React and Tailwind CSS.
- Implemented a clean UI/UX design for an intuitive and user-friendly experience.
- Optimized for performance, accessibility, and mobile responsiveness.

Core Banking System

Academic Prototype for core banking operations

- Developed with Node.js, React, Express, and PostgreSQL.
- Implemented user authentication and authorization, transaction, fund transfer, and loan management.
- It also has an audit log for tracking of activity and security.
